

ABSTRACT

VALVE ARRANGEMENT AND ASSEMBLY FOR DISPENSING A LIQUID
FROM A CONTAINER TO AN ANIMAL

5 An assembly (2) is provided for dispensing a liquid (4)
from a container (6, 54, 58) to the mouth (8) of an
animal, on demand of the animal. The assembly comprises a
sealed container at least partially filled with the
liquid and a valve arrangement (22). The valve
10 arrangement comprises a first tube portion (24) adapted
to pierce a portion (14) of the container to receive the
liquid from the container, a second tube portion (28)
adapted with an end to be used by the animal, and a valve
means adapted to be actuated by the animal to permit the
15 flow of the liquid from the container to the end of the
second tube portion.
